About the company

KMC Services is an experienced logistics operator that has been supporting companies in effective supply chain management for more than 25 years.

We offer comprehensive, tailor-made solutions in:

- > warehousing,
- > transport,
- > VAS,
- > fulfillment,
- > outsourcing,
- > logistics consulting

Our promise

We provide our clients with convenience in cooperation, operational safety, and full support at every stage of the process. We combine high quality standards with a flexible approach and a real understanding of business needs.

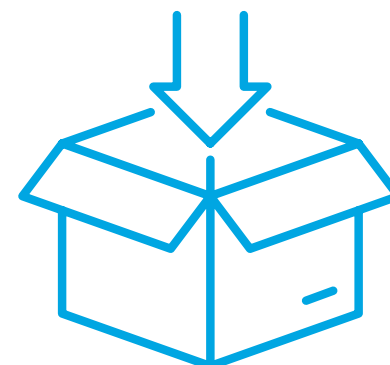

Warehousing and VAS

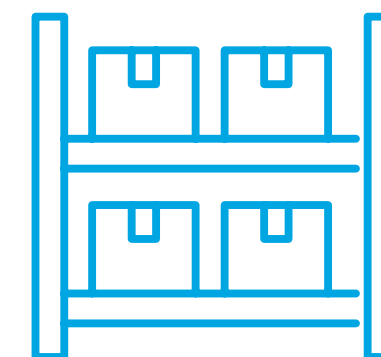

Premium-class warehousing

We offer modern Class A warehouse space and flexible storage models tailored to the type of goods, business scale, and operational dynamics. We ensure safety, full process control, and high service quality standards.

VAS services

We provide a wide range of services supporting logistics and sales processes: packing, repacking, labeling, assembly, inserting, sample picking, cross-docking, and custom solutions tailored to client needs.

Customs warehousing and additional support

We also offer solutions supporting import, export, and the handling of goods requiring additional procedures, including customs warehousing and document handling. This is an important part of a comprehensive offer for companies expecting full coordination of logistics processes.

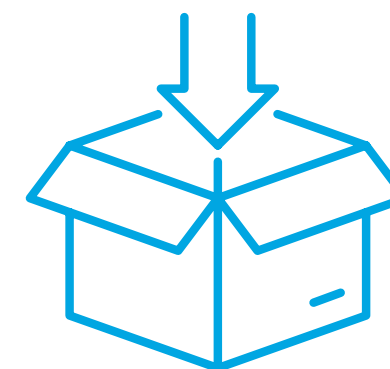

Transport and fulfillment

Transport and forwarding

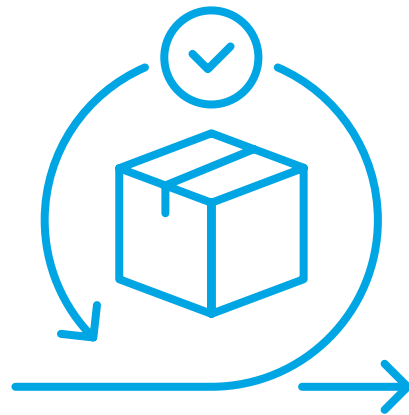

We organize domestic and international road, sea, and air transport, ensuring efficient distribution of parcels, pallets, and full truckload shipments. We focus on timeliness, safety, and solutions adapted to the specifics of the industry and the type of goods.

E-commerce fulfillment

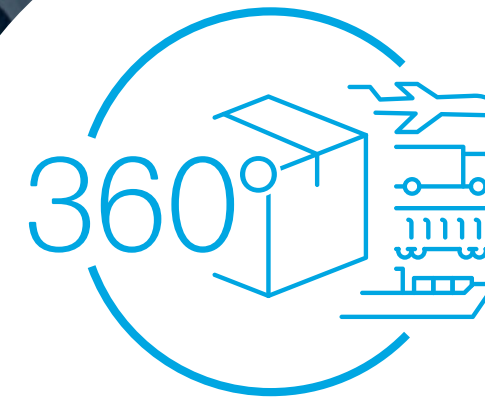

We support online stores and sales brands with comprehensive order fulfillment, from receiving and storing goods through picking and packing to returns handling and integrations with sales platforms. This is a solution for companies that want to scale sales without expanding their own logistics infrastructure.

Business solutions

Warehouse process outsourcing

We take responsibility for managing warehouse processes in the client's warehouses, distribution centers, and internal operations. We provide qualified staff, work organization, know-how, and the right technical and equipment resources.

360° logistics consulting

We design and implement solutions that optimize the entire supply chain, from audit and process analysis to recommendations and implementation support. We rely on expert knowledge, many years of experience, and practical know-how gained in projects for well-known brands.

Why KMC

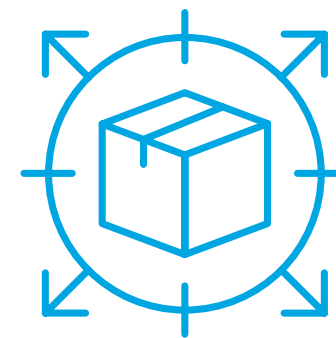

One partner, many possibilities.

More than 25 years of experience.

Individual approach and dedicated support.

Modern, safe, and scalable solutions.

High quality confirmed by standards, certifications, and operational practice.
